## **EXAMINER'S AMENDMENT**

An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicants' representative on 25 October 2005. During the interview, the Examiner noted that the Abstract of the disclosure was greater than 150 words in length and the Examiner's would amend the Abstract to contain less that 150 words.

The application has been amended as follows:

The following is an amended to the Abstract of the disclosure, wherein deleted text is identified within bold double brackets [[]] and newly added text is underlined:

"The invention described herein relates to computer and display methods and systems for [[, among other things,]] acquiring, storing, manipulating, analyzing, linking, retrieving and displaying the data. The methods and systems are illustrated with reference to data on constituents of biological systems, particularly data on gene expression. In this regard, the invention especially relates to interactive systems for displaying gene expression-related data in three-dimensional molecular topographies. Expressed genes [[,]] and their activity are represented as peaks in the topographies. [[The peaks, furthermore, are linked to additional information that can be accessed by a display

pointer.]] Additionally, the invention relates to methods and systems for generating and displaying delta plots, which show differences in gene expression, and to methods and systems for generating molecular movies that show changes in gene expression. While illustrated by reference to gene expression, the methods and systems can be used to generate and manipulate displays of data on other complex populations."

## Conclusion

Any inquiry of a general nature or relating to the status of this application should be directed to Legal Instrument Examiner, Tina Plunkett, whose telephone number is (571) 272-0549.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric S. DeJong whose telephone number is (571) 272-6099. The examiner can normally be reached on 8:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ardin Marschel, Ph.D. can be reached on (571) 272-0718. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.
